Sorry, I stand corrected. I didn't see the forms being filled out. I only took pictures of the holes with bentonite in and on them.

I do have well closure forms done. However, like Jenny said the request should be done on FOIA On-line.

Cheryl Burdett

Hi Cary,

Yes, this is Central Sands. I will give Cheryl a call.

We don't have the first three items. We created temporary borings, not permanent wells. With regards to the fourth, that is considered PII and not releasable.

With regards to number five, I believe the attorneys would say that she should submit a FOIA. The only field notes I am aware of are the photo logs, but Cheryl may have other notes.

Thank you,
Jenny

Is the below investigation from the WECAB "central sands" work this year? If so can someone respond?

If not maybe a RCRA/Superfund thing...

- Cary

Good morning Cary,

Would you or someone in your area able to respond to this inquiry?

Thanks

Comments:
Good afternoon,

My name is Ex. 6 Personal Privacy (PP) and I am a Hydrogeologist at Ex. 6 Personal Privacy (PP)
I am currently looking into the study titled Northeast Juneau County Groundwater Investigation that was conducted by the U.S. Environmental Protection Agency, Region 5 from April 30 to May 3, 2018 in northeast Juneau County, Wisconsin. The EPA Sampling Inspection Report released during August 2018 did not include the following:

- Boring logs
- Development forms
- Well abandonment forms
- General location map for private well samples
- Field notes

Are the documents listed above available online? If not, I would appreciate any information on how to obtain the documents.

Thank you in advance.
